

HCD Cleat Face Conveyor Belt

Abrasion resistant belt complete with cleats moulded in the top cover for elevating bulk products in quarry, fertiliser and mining applications.

Features

- Available in 2 and 3 ply EP160 high strength plies
- Cleats are moulded into the top cover as an integral part of the belt
- Abrasion resistant rubber cover

Benefits

- Good abrasion resistance for longer belt life
- The 2 ply version is ideal for mobile crushing plants when used in conjunction with small pulleys
- The cleats are an integral part of the cover, they cannot be separated and are very durable
- The moulded cleats permit products to be carried up a greater incline (up to 5° more than standard smooth rubber covered belts) thus increasing the storage potential of a conveyor
