

EN Quite often the hard environmental conditions can potentially threaten the re-fuelling operation of OTR equipment and vehicles. PIUSIBOX project is the answer to the need of re-fuelling quickly and safely in almost all places.

PIUSIBOX: An important support for the reliability and long last life of your equipments.

All the tools required for transferring fuel, hoses included, are contained in this strong, compact and easy to transport handy box. The container's main purpose is to keep clean the parts that come in contact with the diesel. A good example is the suction hose which may gather dust, if not adequately protected. Sand and dirt could contaminate the fuel when used the time after. The horizontal-split container makes PIUSIBOX an eco-friendly drip-catcher. The regular, smoothly

joined surfaces make periodic cleaning an easy task. Based on 30 years of experience and Piusi know-how and protected by international patents, PIUSIBOX is the modern, practical and ecological solution for refueling agricultural machinery, worksite equipment and road-building machines – Wherever diesel refuelling must be done quickly and safely. PIUSI BOX is available in 12 V and 24 V versions.

Technical specifications:

- A powerful and reliable self-priming transfer pump capable of delivering 45 l/min, complete with cables and switch.
- Delivery hose and pump nozzle
- Suction hose with foot valve

Innovations:

- 1 - Smart and efficient refuel**
- 2 - Save your workplace and the environment**
- 3 - Cleanliness and safety for your motor**

PIUSIBOX BASIC

Flow rate 45 l/min

- 1 - Pump
- 2 - Nozzle
- 3 - 4 m hose
- 4 - Vantage foot valve

PIUSIBOX PRO

Flow rate 45 l/min

- 1 - Pump
- 2 - Nozzle
- 3 - 6 m hose
- 4 - Vantage foot valve
- 5 - Filter + cartridge
- 6 - Gloves
