SPONGE SILICONE EXTRUSIONS, STRIPS AND CORDS

Jehbsil Silicone Sponge rubber extrusions are available with an extensive range to suit your needs.

With our own in-house tool making division; our secret extruding methods for Silicone Sponge Manufacturing; and our proven chemical combination, we can custom-make your dies to a specific shape. Particular attention is given to detail so the extruded profile is to your requirements.

Suitable compounds together with tolerance accuracy for high and low temperature requirements give you a limitless variety of profile shapes.

With a Temperature Range from -40° up to 220° C. Available in the colours White, Blue, Grey and charcoal.

Jehbsil Silicone products are made of 100% Silicone!

Our Sponge Extrusion range includes two hundred different profiles!

Gaskets and seals can be made from any of our extrusions!
